

AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH (AIUB)
 Faculty of Science and Technology (FST)
 Department of Computer Science (CS)
 Object Oriented Programming 1
 MidTerm Assignment
 Fall 2020-21

Total Marks: 20 **Course Teacher:** MD.NAZMUL HOSSAIN **Time:** 2 Weeks

General Instructions:

1. Answer all the Questions (Handwritten).
2. Use pencil/pen to write the answers and to draw diagrams.
3. Write your name & id at the top of each page to make your content unique.
4. Take photo/scan all the answers and prepare a single .pdf file.
5. Add all your codes & .pdf file in a folder then zip the folder.
6. The name of the .pdf & folder & .zip should be your university id number.
7. Get prepare yourself for the viva as you are going to evaluate strictly.
8. Submission Guidelines:
 - Submission** : MidTerm Assignment
 - Submission Link** : <https://forms.gle/YTtqjg9DR5cpZ3LZ9>
 - Deadline** : 21 November 2020.

Special Note:

If a student is caught for unfair means during the viva then he/she will get 0 out of 20 & will be red marked for rest of the semester.

1. Briefly Explain the following keywords:

- | | |
|------------------|----------------|
| a. OOP | h. Literals |
| b. Class | i. default |
| c. Object | j. new |
| d. Portability | k. this |
| e. Robustness | l. Scanner |
| f. Multithreaded | m. compareTo() |
| g. javac | n. capacity() |

2. Answer the following Questions:

- a. "Java supports multithreaded programming" Explain.
- b. "Java is secured" Explain.
- c. Why Java is platform independent?
- d. Why Java is not 100% Object-oriented?
- e. Explain public static void main(String args[]) in Java.
- f. Why is the main method static?
- g. Can we execute a program without main() method?
- h. How objects are stored in Java?
- i. What is the use of parse method in Java?
- j. What are wrapper classes in Java?
- k. Can we make constructors static?

- l. How can constructor chaining be done using this keyword?
- m. How are destructors defined in Java?
- n. Why we need Static Block?
- o. Why Static Block is called before main method?
- p. What are the restrictions that are applied to the Java static methods?
- q. What is Scanner Class in Java?

3. Write the difference between (Table Format):

- a. JDK, JRE, and JVM
- b. Implicit Type Casting and Explicit Type Casting
- c. Autoboxing and Unboxing
- d. Access specifiers in Java
- e. Constructors and Methods
- f. Heap and Stack Memory
- g. equals() and == in Java
- h. Mutable and Immutable
- i. String, String Builder, and String Buffer
- j. static (class) method and instance method

4. Write code for the following problems using Java.

- a. An organization has Managers, Admin officers, Salesman. All types of Employee have different salaries. Write a simple program to calculate their yearly salaries. You are expected to create necessary classes and a main function to print Employee information.
- b. A large company pays its salespeople on a commission basis. The salespeople each receive \$200 per week plus 9% of their gross sales for that week. For example, a salesperson who sells \$5000 worth of chemicals in a week receives \$200 plus 9% of \$5000, or a total of \$650. Develop a program that uses a while statement to input each salesperson's gross sales for last week and calculates and displays that salesperson's earnings.
- c. Suppose you are developing a spelling checker game for kids where a kid will enter words to check the spelling. When a kid wrongly input a number instead of a letter, an exception will arise and it will show that "Only letters are accepted" in the catch.
- d. Drivers are concerned with the mileage obtained by their automobiles. One driver has kept track of several trips by recording miles driven and gallons used for each trip. Develop a class DriveHistory that uses a while statement to input the miles driven and gallons used for each trip. The program should calculate and display the miles per gallon obtained for each trip.
- e. Suppose you are a developer in Kuratoli Software Solutions. Your company is developing a University Management System. You have been assigned to design the registration program of students. Where each student belongs to a Department, department offers Courses, Students can take multiple courses. But there is a policy where student can take up to 5 courses in each Semester. As it is an open credit system student are allowed to register as many semesters they want.

5. Explain the following figures:

Figure: 1

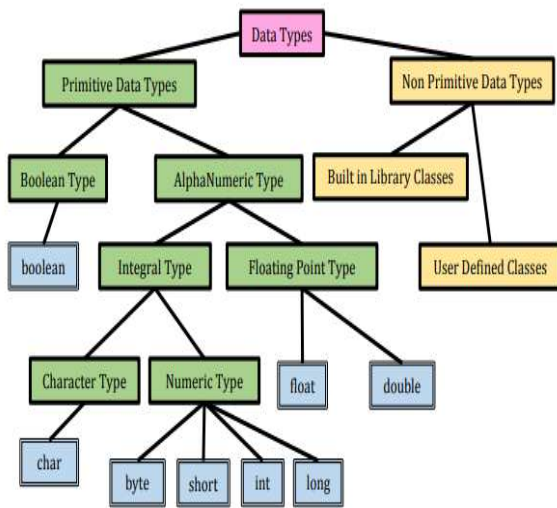

Figure: Data Type Classification Tree

Figure: 3

Figure: 4

Figure: 5

Good Luck!
